HOW TO INJECT YUVENIS

: Non-surgical DNA injecting therapy

- 1** Topical numbing cream is applied on the skin for 20 minutes.
- 2** Your doctor then uses a fine needle to administer recommended amounts of Yuvenis (refer to previous page) under the skin.
The treatment takes about 10 minutes to complete.
- 3** Administer healing LED Red or Infrared Light to sooth the skin and reduce redness and swelling.

AFTER TREATMENT

- ✓ 3 - 4 weeks to see visible improvements
- ✓ Regain daily routine immediately
- ✓ Temporary swelling, bruising
- ✓ Visible bumps for few hours to a day
